About

Koop Solutions is a veteran-owned technology solutions firm specializing in advanced computing and enterprise IT modernization. Built on more than 30 years of software development and mission-critical delivery, we help federal systems integrators translate complex technical requirements into fully operational capabilities. As an emerging SDVOSB, we partner with government contractors to execute rigorous data engineering, secure multi-cloud architecture, and Generative AI integrations. We understand the demands of federal compliance, bringing proven experience navigating FedRAMP constraints to deliver robust cloud infrastructure, automated workflow pipelines, and enterprise systems that directly accelerate federal adoption.

Core Capabilities

Koop Solutions LLC provides IT strategy, project management, data analytics, data engineering, data warehousing, and enterprise IT modernization. We deliver modern application design, database administration, business intelligence, executive dashboards, ETL pipelines, and cloud migrations across AWS, Azure, and Google Cloud. Our team supports large federal systems integrators with digital transformation, technology roadmaps, and DevSecOps. Koop Solutions LLC excels at telecommunications, call center modernization, contact center technologies, unified communications, and customer experience (CX) platforms. We provide workflow automation, Agile and Scrum management, full lifecycle software engineering, API development, network infrastructure, quality assurance, and mission-critical support for federal and prime partners. Certified PMP and CSM leadership.

Key Personnel Past Performance

- **Department of Defense (US Army, US Navy, USMC)** – eProcurement Application Development & Enterprise Product Solutions
- **United States Postal Service (USPS)** – Cloud Architecture, Data Engineering, GenAI Agent Development & Genesys Modernization
- **Department of Housing and Urban Development (HUD)** – Enterprise Data Warehousing & Digital Modernization

Key Differentiators:

- **30+ Years Experience:** Deep expertise in enterprise systems design, software development, and federal delivery.
- **Multi-Cloud Engineering:** Expertise across Microsoft, AWS, and Google Cloud ecosystems.
- **Agile Delivery:** Veteran-Owned Small Business structure with robust teaming and partner network.
